## Introduction

We have seen several long-term changes in our lifestyles and attitudes in the last 2 years. Digital has become a key enabler for many of these changes. Be it researching/purchasing products or buying services, digital platforms have now become crucial partners. 350 MM Indian consumers are expected to make a purchase online in 2025 as per the MMA-GroupM report, which is a steep jump from 150 MM online buyers in 2020.

Brands have adapted by aiming to reshape their digital strategies from being just a support to their offline systems to becoming a frontal touchpoint in building consumer connections. While this transformation has

happened in media strategies, we are yet to see the same happening with content marketing strategies. Given the role of various emerging touchpoints e.g. ecommerce platforms, building a holistic creative communication strategy for these platforms is crucial.

This playbook presents ideas for building communication strategies for ecommerce networks. The first section of the playbook covers key reasons why brands should have a separate communication strategy for ecommerce touchpoints. The second section covers recommended content and engagement strategies to efficiently drive visibility and recall with millions of 'intent' consumers.

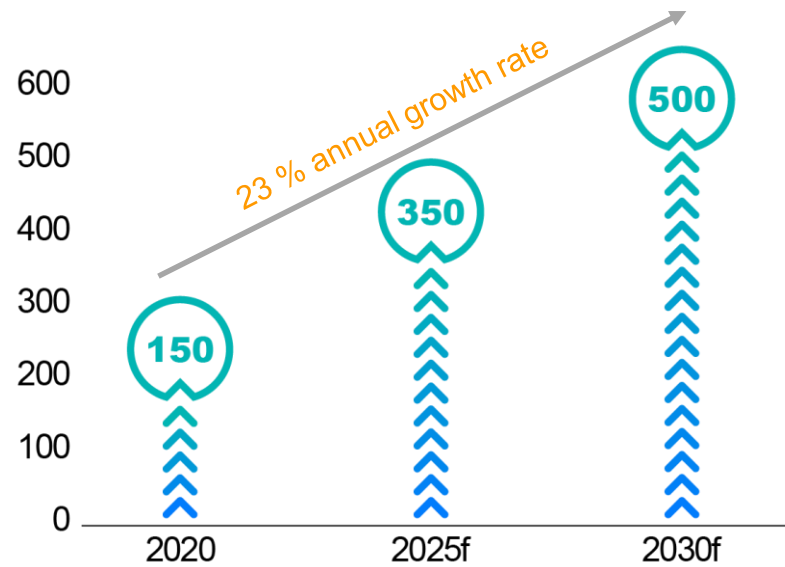

## Section 1

# Evolution in digital engagement touchpoints

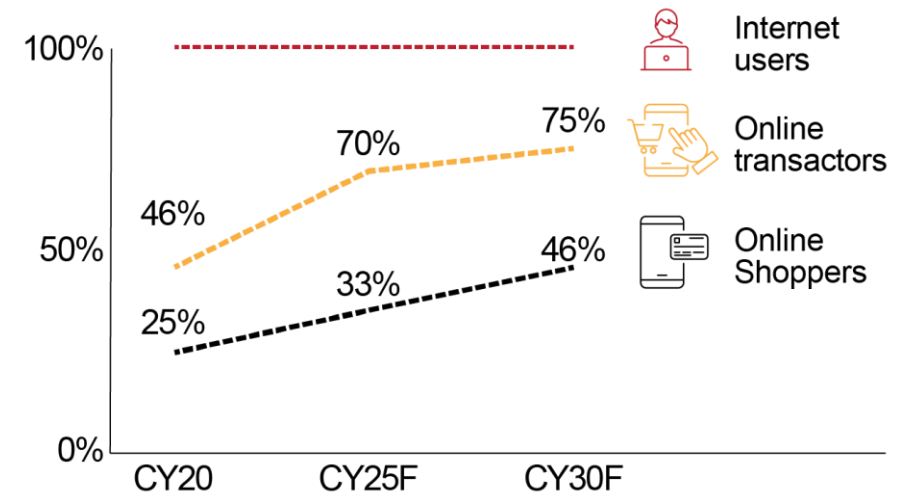

## Growth in 'Digital Consumers'

150 million Indians currently transact online and this base is expected to grow to 350 million by 2025

### India annual online shoppers (MM)

### Penetration of online transactions/shopping as % of internet users

## Digital consumers are more informed, more participative, well-employed and more affluent than the average internet users in India...

Amazon users' profile compared to average internet users\*:-

**30%**

more likely to be  
a <30 years old

**50%**

more likely to be  
a graduate

**50%**

more likely to hold  
a corporate job

**30%**

## Digital consumers are open to choices when they start researching products

Similar to 2020, ~60% of product searches on Amazon.in remained generic in 2021

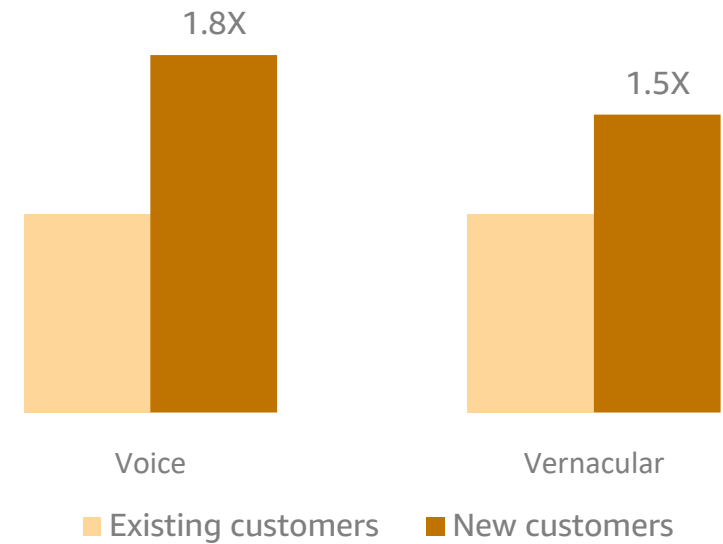

## New-to-online consumers are more pre-disposed towards voice and vernacular searches

Both voice and vernacular searches are growing rapidly in India

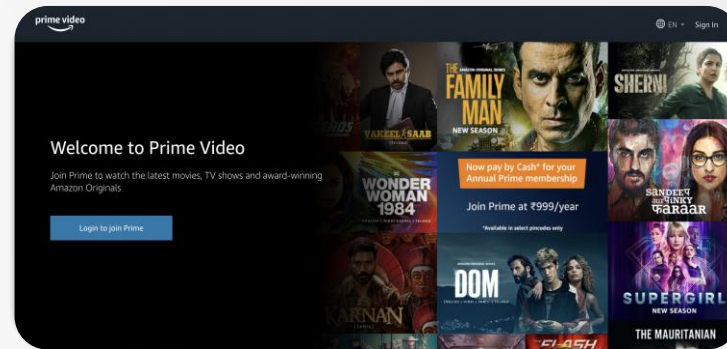

New-to-online consumers over-index on both voice and vernacular searches.

# The 'new normal': Digital touchpoints have become a crucial part of consumers' daily lives

From smart assistants to payments to product research and shopping.....

## Section 2

# Recommendations for building a Content strategy

# 1. Leverage 1<sup>st</sup> party audience intelligence

# Understand your consumer better through 1st party view of product affinity/choices

Example : Amazon's audience cohorts' intelligence was leveraged along with a toothpaste brand's brief to granularly define the Target Persona

# Leverage affinity signals to customize your communication creatives

Example : Product affinity signals and reviews were utilised to build multiple concepts basis life stage :-
